

State of the Art Technology ◀ Improved Visibility

- ◀ The Pulsar LED lamp is state of the art technology designed to enhance normal arrowboard lamps
- ◀ Pulsed burst of white light prior to the amber flash commands attention
- ◀ The white pulsed flash does not effect MUTCD operation of amber flash sequences
- ◀ The pulsed white light instantly causes the driver to look at and recognize the light source.
- ◀ White is visible when weather conditions drop visibility of amber lights
- ◀ Just as airports use flashing lights as anti-collision devices on runways, the Pulsar LED Lamp will effectively enhance visibility
